

Below are the six (6) survey questions

(1) What are the primary factors which lead to lack of access to healthcare in your community?

(2) Identify three variables which enhance the consistent provision of care in your region currently.

(3) List three key strategies which have been effective in your practice in fostering fair access/better quality of patient care.

(4) Over the past two years, what has been the most significant decision at the national level limiting equitable access to care for your patients?

(5) Had we realized full Medicaid Expansion in all 50 states post June 2012, what would be the most significant barrier to full access to care at this time for the patients you treat/settings you work in?

(6) Healthcare Parity would make psychiatric provider healthcare reimbursements on par with other medical specialty providers. Please list three ways Healthcare Parity may effect your clinical practice.
